The new trauma workflow involves a Trauma Rounding Order which will place the patient on the Trauma Rounds Patient List, identifying patients for trauma rounding.

1. The Provider places the order for Trauma Rounds on the patient.
   
a. Notice the Comments default to “This patient has been selected to participate in Trauma Rounds. The patient meets the criteria for Trauma Registry.”

2. Signing this order places the patient on the Trauma Rounds Patient List for your facility. For instance, here we find the patient on the SVB Trauma Rounds System List in Patient Lists.
